Description

Technical specification

- Nominal voltage: 12V
- **Work range: 4.5 - 12.0V**
- Shaft's diameter: 3,17mm
- Shaft's length: 8,5mm
- Body's diameter: 35,8mm
- Body's length: 50,0mm
- Complete length: 67,0mm
- Weight: 158g

Characteristics for 6V voltage:

- Revolutions without load: 5.800 rpm
- **Power consumption without load: 0,4A**
- Revolutions with max load: 4.800 rpm
- **Power consumption at max efficiency: 1,9A**
- Momentum at max efficiency: 13.280mN-m
- Max power consumption: 4,48A
- Max. efficiency (without transmission): 62.9%

Characteristics for 12V voltage:

- **Revolutions without load: 11.700 rpm**
- **Power consumption without load: 0,4A**
- **Power consumption at max efficiency: 2,0A**
- Max. efficiency (without transmission): 62.7%
